

NOVA handrims with anti-slip insert

The NOVA handrim is a good choice for users with full or slightly reduced hand strength. The anti-slip insert made of environmentally friendly food grade silicone provides an excellent grip which makes the wheelchair more manoeuvrable and easier to drive.

- High sides of hard anodized aluminium for easier braking
- The silicone insert is not too sticky which results in a reliable and comfortable grip as sand and other materials do not stick onto it.
- Good anti-slip performance even when wet.
- 6 splices (39210Q)
- Available in black hard anodized - shiny silver anodized on request
- Replaceable silicone insert
