

Flow handrim

The lightest in motion.

The FLOW handrim is the ergonomic handrim available on the market with much better grip than standard pushrim. The profile is optimized for users with small and big hands and still offering very ergonomic design.

- The weight is externally better than any other handrim on the market without silicone strip.
- No need to press so much to propel the wheelchair.
- Not so much noise when you brake.
- It fits comfortably in hand.
- Affordable price.
